

Bartoline Premium Wallpaper Primer & Sealer

Technical Data Sheet

Description

Bartoline Premium Wallpaper Primer & Sealer is a specially formulated product designed to promote adhesion to many difficult surfaces. Promotes the adhesion of wallcoverings and emulsion paints. Reduces seam splits, raised edges and bubbling of wallcoverings.

Directions

Walls should be sound, dry, clean and free from damp, dust and grease or any contaminant which might affect adhesion. Allow new plaster to dry out completely. Metal surfaces should be treated to prevent corrosion.

Dilution Rate

Absorbent Surfaces: 1 part Primer Sealer to 3 parts water.
Non-Absorbent Surfaces: 1 part Primer Sealer to 1 part water.

Application

Primer Sealer should be diluted with water dependent on the surface being primed. Stir before use and apply one coat only by brush and allow to dry before adhesive application. It is recommended to check that a good bond has been achieved between Primer Sealer and the surface before commencing hanging. 2 or 3 drops only should be hung and allowed to dry prior to completion to ascertain that a satisfactory bond is being achieved.

Coverage

1:3 approximately 12 sq metres/kg
1:1 approximately 16 sq metres/kg

Cleaning & Storage

Replace lid firmly. Clean tools with warm soapy water before adhesive sets. Protect from frost.

Health and Safety

See MSDS for full information.

Technical Data

Measurement	Value	Test Method
Physical State	Liquid	Visual
Colour	White	Visual
Odour	Barely perceptible	
Flash point	Not Applicable	
Viscosity	2700 – 3400cps	Brookfield Viscometer Spindle 3/Speed 20
pH	6-7	
Solids content	25 - 28%
